

ABDUL FATHAH

Full-Stack / Front-End Developer

@ fathahv910@gmail.com
in abdul-fathah-a12460325

+91-8089181910

Malappuram, Kerala, India

SUMMARY

Full-stack Python developer with a passion for building clean, performant, and user-focused web applications. Skilled in end-to-end development — from front-end UI engineering and component design to Python-based backend development, API creation, database management, deployment, and performance tuning. Proven ability to deliver production-ready solutions for clients and small businesses, working closely with designers and teams to iterate quickly and ship high-quality features.

EXPERIENCE

Full-Stack Python Developer (Part-Time)

Tegand InfoTech

Nov 2024 – Present

Remote / On-Site

- Developed full-stack features using Python, Django/Flask, JavaScript, and modern UI frameworks.
- Built and maintained REST APIs, handled database queries, and optimized backend logic.
- Implemented responsive front-end components and improved UI/UX consistency.
- Collaborated with senior developers, designers, and stakeholders to deliver production-ready modules.
- Participated in debugging, code reviews, documentation, and deployment workflows.

Client Projects (Web Development)

Freelance / Independent Work

2023 – Present

Remote

- Designed and developed responsive websites with modern layouts, smooth interactions, and clean UI/UX.
- Built custom front-end components, dark mode UIs, and optimized load performance across all devices.
- Implemented contact/lead forms with validation, email notifications, and basic analytics tracking.
- Developed full project pages and admin panels for managing content and highlights.
- Delivered production-ready websites such as xtenrealestate.com, rfstudio.ae, neumoon.ae, and golden-fork.

SELECTED PROJECTS

- XTen Real Estate (xtenrealestate.com)** — Responsive real-estate website for a Dubai firm; implemented property sections, forms, and performance optimizations.
- RF Studio (rfstudio.ae)** — Agency website; delivered animations, sections for services/portfolio, and cross-device testing.
- Neumoon (neumoon.ae)** — Modern marketing site; structured content blocks, SEO basics (meta tags, sitemaps), and deployment.
- Golden Fork App (golden-fork-eta.vercel.app)** — Deployed a web app; handled hosting configuration, environment setup, and feature iterations.

SKILLS

- Front-End:** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+)
- Frameworks:** React, Next.js
- Back-End:** Python, Django, REST APIs
- Databases:** MySQL, PostgreSQL, SQLite
- Build & Tools:** Git, GitHub, npm, Vite
- Testing/Quality:** Responsive design, debugging, performance optimization
- Other:** Basic SEO, API integrations, deployments (Vercel, cPanel, etc.)

Efficient Execution

HIGHLIGHTS

- Built multiple modern portfolio and client websites featuring dark mode, animations, and clean responsive layouts.
- Developed simple AI chatbot UIs and interactive components to enhance user experience.
- Created custom admin views for managing project content, highlights, and dynamic sections.
- Improved build and deployment workflows; resolved development environment issues and standardized scripts.
- Delivered real-world production projects for businesses, ensuring performance, accessibility, and mobile-first design.
- Integrated APIs, handled form submissions, and implemented backend logic for smooth and secure data processing.

EDUCATION

Bachelor of Computer Applications (BCA)

Majlis Arts and Science College (Autonomous), University of Calicut

2024 – 2026

Malappuram, Kerala

- Studied core subjects such as Web Development, Programming, DBMS, Data Structures, and Software Engineering.
- Participated in technical events, practical labs, and project-based coursework.
